Extend Your IT Team with Professional Services

Leverage our expert IT engineers to refine how you integrate technology into your business.

Dasher Professional Services

Build next-generation IT architecture that powers your enterprise with our world-class technology partners and multi-vendor engineering expertise in **hybrid cloud services**, **cybersecurity**, **data center**, and **enterprise networking**.

Dasher does IT right

- ☑ **Simplifying technology**
- ☑ **Streamlining implementations**
- ☑ **Speeding results**

We take IT personally

→ Assessing the IT infrastructure you manage

→ Training the experts you want

→ Renewing the support you seek

→ Financing the projects you budget

→ Managing international logistics

→ Finding the staff you need

Architecture & Planning

Hybrid Cloud Assessment

Dasher's certified experts deliver a transparent view of your hybrid cloud environment to arm you with the knowledge to create an effective IT strategy. A technical advisor is assigned to your project – delivering a detailed report on your public and private clouds, cybersecurity posture and enterprise network.

Solution Architecture

Our engineers design and implement a strategic infrastructure roadmap to meet your critical needs and business objectives. By partnering with Dasher as your strategic technology partner, your organization has a direct line to our IT pros with diverse industry backgrounds and highly-specialized technical expertise. Think of Dasher as your virtual CIO or CISO.

IT Implementation

Our expert engineers set the standard for personal service through our trusted work. Dasher can validate, migrate, and integrate new technologies into your environment with our best practice implementation strategies focused on collaboration and communication.

Multi-Vendor Demo and Innovation Lab

Dasher's 5,000+ square-foot lab in Silicon Valley is a fully functioning data center with $5 million in equipment. Try before you buy in our multi-vendor lab featuring the latest in cybersecurity, converged solutions, private cloud infrastructure, storage, networking, servers, and management software.

Contracts & Logistics

Contract Renewals

Dasher is a one-stop shop for IT services. Our dedicated renewals team manages your IT support agreements, so you can spend more time innovating. We consolidate your IT support agreements to capitalize on significant savings and streamline with a single point of contact.

International Logistics Management

We remove the headaches and overhead of international system deployments. Dasher assigns a designated project management team to simplify the process – planning, organizing, and delineating responsibilities to meet your organization's business objectives.

Financing Solutions

Dasher offers clients budget-friendly payment options to ensure stable IT that operates at peak performance. Decide when you pay and receive line of sight reports into upcoming IT renewal costs to allow for proactive budget management with your executive team.

"Trust that Dasher has some of the best engineers in the industry. They are on the cutting edge, always."

– Al Rysbekov, Channel Business Manager,
Palo Alto Networks

Dasher Professional Services Partners

Operations Management

Operational Task Management

Dasher can manage and enhance your solution to optimize ROI, even as your business needs change and evolve. We minimize downtime and maximize business productivity by supporting your daily operations through real-time management and monitoring of your physical and virtual environments.

Training Programs

Dasher's certified engineers also design and deliver customized technical training that integrates with available training materials from manufacturers, greatly increasing the return on your training investment and shortening time-to-proficiency.

Elastic Staffing

We have expertise and resources ready, just when your IT projects need them. Our expert engineers can act as a member of your technical staff, offering ongoing support with quarterly reviews to ensure each project under Dasher's command is successfully executed.

You can't afford to miss a critical deadline or compromise sensitive data.
