Dasher gets IT done

We solve critical tech infrastructure challenges with five major solutions:

Cybersecurity
Protect your network and data from evolving threats, both internal and external.

Enterprise Networking
Deliver the wireless and wired network performance your employees need to succeed.
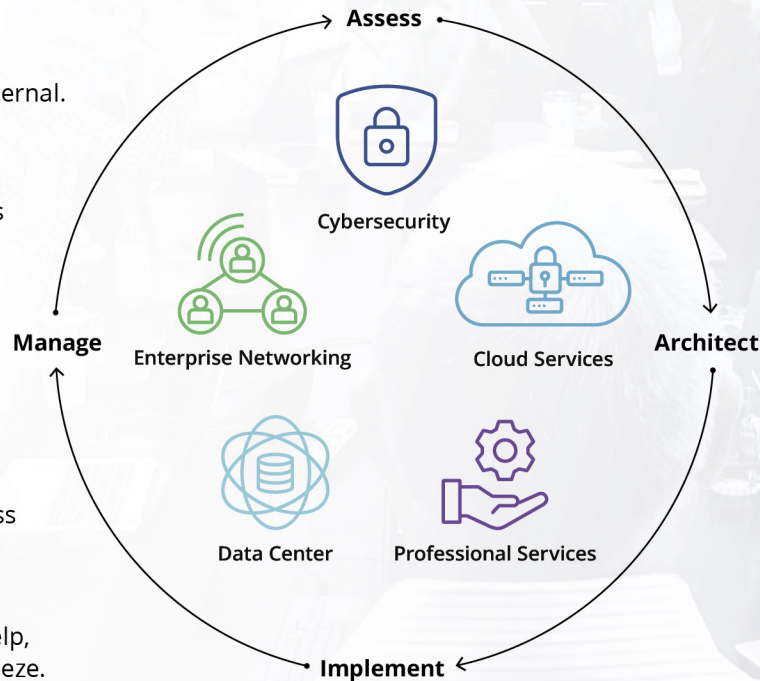

Data Centers
Deploy advanced, hyperconverged infrastructure solutions that create competitive advantages.

Cloud Services
Optimize performance (and capital) with specialized solutions and seamless implementations.

Professional Services
Get the support, financing, logistics help, and staffing you need to make IT a breeze.

Dasher makes IT count

Dasher helps companies bridge technology and talent gaps with purpose-built services. We take IT personally by:

- ☑ Prioritizing our clients' success
- ☑ Designing dependable, unique solutions
- ☑ Providing personal, responsive service
- ☑ Hiring the most talented engineers

- ☑ Promising a 2:1 engineer-to-account executive ratio
- ☑ Solving critical technology challenges
- ☑ Delivering transformative results
- ☑ Becoming a trusted technology advisor

Dasher breaks IT down

Assess
We dig deep to determine how best to fix today's IT challenges and meet tomorrow's company objectives.

Implement
Our expert engineers embed themselves on site, deploying solutions on time, at budget, and within spec.

Architect
We tailor IT solutions for each client, overcoming the biggest issues and addressing the smallest detail.

Manage
We can manage and enhance your solutions to optimize ROI, even as your business needs evolve.

Dasher does IT right

Simplifying technology

Streamlining deployments

Speeding results

Extend your IT team with Dasher's professional services.

→ Assessing the IT infrastructure you manage

→ Training the experts you want

→ Renewing the support you seek

→ Financing the projects you budget

→ Managing the international logistics and shipping that take you around the world

→ Finding the staff you need

Let's get IT together

Put your application to the test in the Dasher Innovation Lab

A fully functioning data center for live demos, vendor "bake-offs," proofs of concept, interoperability tests, performance benchmarks, and troubleshooting. Utilize Dasher's 5,000+ square foot demo and integration space and $5M equipment investment center for testing, environment configurations, pre-assembly, and storage services.
